

# MOGALAKWENA MUNICIPALITY

## ANNUAL FINANCIAL STATEMENTS

for the year ended 30 June 2012

### REPORT OF THE CHIEF FINANCIAL OFFICER

#### 1. INTRODUCTION

It gives me great pleasure to present the Annual Financial Statements of Mogalakwena Municipality at 30 June 2012.

These Annual Financial Statements have been prepared in accordance with Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board (ASB) in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003). The standards and pronouncements that form the GRAP Reporting Framework for the 2011/12 financial period is set out in Directive 5 issued by the ASB on 11 March 2009.

The Statement of Financial Position at 30 June 2012 indicates an increase in Net Assets, and an increase in both Non-current Liabilities and Current Liabilities.

The increase in Net Assets is ascribed primarily to the increase in Accumulated Surplus as a result of the surplus generated on the operating account. The increase in Non-current Liabilities is primarily as a result of the increases in Retirement Benefit Liabilities and Long-service Benefits. The increase in Current Liabilities is primarily as a result of the increase in Creditors and Unspent Conditional Grants.

<b>Balance at end of year</b>	<b>206,268,613</b>	<b>165,361,680</b>
-------------------------------	--------------------	--------------------

In determining the recoverability of Receivables, the municipality has placed strong emphasis on verifying the indigent status of consumers. Provision for impairment of Receivables has been made for all consumer balances outstanding based on the payment ratio over 12 months per service type. No further credit provision is required in excess of the Provision for Impairment.

**206,268,613**

**165,361,680**

No provision has been made in respect of government debt as these amounts are considered to be fully recoverable. The municipality holds collateral over these balances in the form of Consumer Deposits / Guarantees, which are not covering the total outstanding debt and vacant property respectively.

**5.3 Reconciliation of Provision for Impairment**

Balance at beginning of year	35,228,893	32,759,826
Impairment Losses recognised	2,940,005	2,469,067
Impairment Losses reversed	-	-
Amounts written off as uncollectable	-	-
Amounts recovered	-	-
<b>Balance at end of year</b>	<b><u>38,168,898</u></b>	<b><u>35,228,893</u></b>

The Provision for Impairment was calculated after grouping all the financial assets of similar nature and risk ratings and assessing the recoverability.

**38,168,898**      **35,228,893**

In determining the recoverability of a Rates Assessment Debtor and Receivables from Non-exchange Transactions, the municipality considers any change in the credit quality of the Rates Assessment Debtor from the date credit was initially granted up to the reporting date. The concentration of credit risk is limited due to the customer base being large and unrelated. Accordingly, the management believe that there is no further credit provision required in excess of the Provision for Impairment.

No Provision for Impairment has been made in respect of government debt as these amounts are considered to be fully recoverable. The municipality holds collateral over these balances in the form of Rates Assessment Deposits / Guarantees, which are not covering the total outstanding debt and vacant property respectively.

Furthermore, no Provision for Impairment was calculated on Receivables other than Assessment Rates Debtors as the management is of the opinion that all Receivables are recoverable within normal credit terms.

**6. VAT RECEIVABLE**

Vat Receivable	<b><u>7,495,337</u></b>	<b><u>12,423,537</u></b>
----------------	-------------------------	--------------------------

*VAT Receivable* has been restated to correctly classify amounts receivable in terms of a VAT Audit performed. Refer to Note 43.2 on "Correction of Error" for details of the restatement.

Vat is payable on the receipts basis. Only once payment is received from debtors, VAT is paid over to SARS.

No interest is payable to SARS if the VAT is paid over timeously, but interest for late payments is charged according to SARS policies. The municipality has financial risk policies in place to ensure that payments are affected before the due date.

<b>8. OPERATING LEASE RECEIVABLES</b>		
Operating Leases are recognised on the straight-line basis as per the requirement of GRAP 13. In respect of Non-cancellable Operating Leases the following assets have been recognised:		
Balance at beginning of year	56,877	79,980
Operating Lease Revenue recorded	803,696	328,113
Operating Lease Revenue effected	(749,334)	(351,216)
<b>Total Operating Lease Receivables</b>	<b>111,239</b>	<b>56,877</b>

**8.1 Leasing Arrangements**

**The Municipality as Lessor:**

Operating Leases relate to Property owned by the municipality with lease terms of between 1 to 82 (2011: 1 to 83) years, with an option to extend. All operating lease contracts contain market review clauses in the event that the lessee exercises its option to renew. The lessee does not have an option to purchase the property at the expiry of the lease period.

The property rental income earned by the municipality from its investment property, all of which is leased out under operating leases, amounted to R550,871 (2011: R503,986).

**8.2 Amounts receivable under Operating Leases**

At the Reporting Date the following minimum lease payments were receivable under Non-cancellable Operating Leases for Property, Plant and Equipment, which are receivable as follows:

Up to 1 year	677,798	232,500
2 to 5 years	1,574,692	300,810
More than 5 years	232,786	240,953
<b>Total Operating Lease Arrangements</b>	<b>2,485,276</b>	<b>774,264</b>

The impact of charging the escalations in Operating Leases on a straight-line basis over the term of the lease has been an increase of R54,362 (2011: decrease of R23,103) in current year income.

The following restrictions have been imposed by the municipality in terms of the lease agreements:

- (i) The lessee shall not have the right to sublet, cede or assign the whole or any portion of the premises let.
- (ii) The lessor or its duly authorised agent, representative or servant shall have the right at all reasonable times to inspect the premises let.
- (iii) The lessee shall use the premises let for the sole purpose prescribed in the agreement.

**DEBTORS CAPITALISED**

Arrear amounts on services are capitalised on completion of a formal agreement or upon being handed over to attorneys for collection. These arrear amounts are then paid to the municipality in monthly instalments over a period not exceeding 48 months. No interest is charged on these amounts where the stipulations of the agreement are adhered to.

**REMOVAL COST**

The municipality pays the full removal cost of qualifying newly appointed staff of which the employees repay 50% by means of a loan over a maximum period of 2 years. The loans are repayable in the year 2011/12.

**SALE OF STANDS**

Stands are sold on a cash/bank guarantee basis. The outstanding loans are repayable in the year 2011/12.

**STUDY COST LOANS**

In terms of the MFMA no Study Cost Loans are granted anymore. The outstanding amount is in respect of loans granted before 01 July 2005. Beneficiaries were entitled to Study Cost Loans at an interest rate of 5,00% per annum, repayable over a maximum period of 6 years. The balance of the loans are in respect of third parties and are repayable in the year 2011/12.

The municipality does not hold deposits or any other security for its Long-term Receivables.

No Long-term Receivables have been pledged as security for the municipality's financial liabilities.

The municipality provides certain post-retirement health care benefits by funding the medical aid contributions of qualifying retired members of the municipality. According to the rules of the Medical Aid Funds, with which the municipality is associated, a member (who is on the current Conditions of Service) is entitled to remain a continued member of such medical aid fund on retirement, in which case the municipality is liable for a certain portion of the medical aid membership fee. The municipality operates an unfunded defined benefit plan for these qualifying employees. No other post-retirement benefits are provided to these employees.

The most recent actuarial valuations of plan assets and the present value of the defined benefit obligation were carried out at 30 June 2012 by Mr C Weiss, Fellow of the Actuarial Society of South Africa. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

The members of the Post-employment Health Care Benefit Plan are made up as follows:

**23.1 Long Service Awards**

The municipality operates an unfunded defined benefit plan for all its employees. Under the plan, a Long-service Award is payable after 10 years of continuous service, and every 5 years of continuous service thereafter, to employees. The provision is an estimate of the long-service based on historical staff turnover. No other long-service benefits are provided to employees.

The most recent actuarial valuations of plan assets and the present value of the defined benefit obligation were carried out at 30 June 2012 by Mr C Weiss, Fellow of the Actuarial Society of South Africa. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

At year end, 674 (2011: 662) employees were eligible for Long-service Awards.

The Current-service Cost for the year ending 30 June 2012 is estimated to be R799,362, whereas the cost for the ensuing year is estimated to be R972 461 (30 June 2011: R663,240 and R799,362 respectively).

**51.2 Fair Value**

The following methods and assumptions were used to estimate the Fair Value of each class of Financial Instrument for which it is practical to estimate such value:

**Cash and Short-term Investments**

The carrying amount approximates the Fair Value because of the short maturity of these instruments.

**Long-term Investments**

The Fair Value of some Investments are estimated based on quoted market prices of those or similar investments. Unlisted Equity Investments are estimated using the discounted cash flow method.

**Loan Receivables/Payables**

Interest-bearing Borrowings and Receivables are generally at interest rates in line with those currently available in the market on a floating-rate basis, and therefore the Fair Value of these Financial Assets and Liabilities closely approximates their carrying values. Fixed interest-rate instruments are fair valued based on the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date.

**Trade and Other Receivables/Payables**

The Fair Value of Trade and Other Payables is estimated at the present value of future cash flows.

The management of the municipality is of the opinion that the carrying value of Trade and Other Receivables recorded at amortised cost in the Annual Financial Statements approximate their fair values. The Fair Value of Trade Receivables were determined after considering the standard terms and conditions of agreements entered into between the municipality and other parties as well as the the current payment ratio's of the municipality's debtors.

**Other Financial Assets and Liabilities**

The Fair Value of Other Financial Assets and Financial Liabilities (excluding Derivative Instruments) is determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes for similar instruments.

**Long-term Liabilities**

The Fair Value of Long-term Liabilities was determined after considering the standard terms and conditions of agreements entered into between the municipality and the relevant financing institutions.

Management considers the carrying amounts of Financial Assets and Financial Liabilities recorded at amortised cost in the Annual Financial Statements to approximate their Fair Values on 30 June 2012, as a result of the short-term maturity of these assets and liabilities.

No Financial Instruments of the municipality have been reclassified during the year.

**Assumptions used in determining Fair Value of Financial Assets and Financial Liabilities**

The table below analyses Financial Instruments carried at Fair Value at the end of the reporting period by the level of fair-value hierarchy as required by GRAP 104. The different levels are based on the extent to which quoted prices are used in the calculation of the Fair Value of the Financial Instruments. The levels have been defined as follows:

Level 1:-

Fair Values are based on quoted market prices (unadjusted) in active markets for an identical instrument.

Level 2:-

Fair Values are calculated using valuation techniques based on observable inputs, either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using quoted market prices in active markets for similar instruments, quoted prices for identical or similar instruments in markets that are considered less than active, or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3:-

Fair Values are based on valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. Also, this category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

**51.3 Capital Risk Management**

The municipality manages its capital to ensure that the municipality will be able to continue as a going concern while delivering sustainable services to consumers through the optimisation of the debt and equity balance. The municipality's overall strategy remains unchanged from 2010.

The capital structure of the municipality consists of debt, which includes Cash and Cash Equivalents and Equity, comprising Funds, Reserves and Accumulated Surplus as disclosed in Note 24 and the Statement of Changes in Net Assets.

**Gearing Ratio**

**2012**  
**R**                      **2011**  
**R**

The gearing ratio at the year-end was as follows:

Debt	19,925,796	17,225,701
Cash and Cash Equivalents	(2,641,979)	(31,245,683)
Net Debt	<u>17,283,817</u>	<u>(14,019,983)</u>

<b>Net debt to equity ratio</b>	<u><b>1.37%</b></u>	<u><b>-1.33%</b></u>

Debt is defined as Long- and Short-term Liabilities.

Equity includes all Funds and Reserves of the municipality, disclosed as Net Assets in the Statement of Financial Performance and Net Debt as described above.

**51.4 Financial Risk Management Objectives**

The Accounting Officer has overall responsibility for the establishment and oversight of the municipality's risk management framework. The municipality's risk management policies are established to identify and analyse the risks faced by the municipality, to set appropriate risk limits and controls and to monitor risks and adherence to limits.

Due to the largely non-trading nature of activities and the way in which they are financed, municipalities are not exposed to the degree of financial risk faced by business entities. Financial Instruments play a much more limited role in creating or changing risks that would be typical of listed companies to which the IAS's mainly apply. Generally, Financial Assets and Liabilities are generated by day-to-day operational activities and are not held to manage the risks facing the municipality in undertaking its activities.

The Department Financial Services monitors and manages the financial risks relating to the operations through internal policies and procedures. These risks include interest rate risk, credit risk and liquidity risk. Compliance with policies and procedures is reviewed by the internal auditors on a continuous basis, and annually by external auditors. The municipality does not enter into or trade financial instruments for speculative purposes.

Internal audit, responsible for initiating a control framework and monitoring and responding to potential risk, reports periodically to the municipality's audit committee, an independent body that monitors the effectiveness of the internal audit function.

Further quantitative disclosures are included throughout these Annual Financial Statements.

**51.5 Significant Risks**

It is the policy of the municipality to disclose information that enables the user of its Annual Financial Statements to evaluate the nature and extent of risks arising from Financial Instruments to which the municipality is exposed on the reporting date.

The municipality has exposure to the following risks from its operations in Financial Instruments:

- Credit Risk;
- Liquidity Risk; and
- Market Risk.

Risks and exposures are disclosed as follows:

**MOGALAKWENA MUNICIPALITY**  
**NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012**

**2012**  
**R**

**2011**  
**R**

**Market Risk**

Market Risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the municipality's income or the value of its holdings in Financial Instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

**Credit Risk**

Credit Risk is the risk of financial loss to the municipality if a customer or counterparty to a Financial Instrument fails to meet its contractual obligations and arises principally from the municipality's receivables from customers and investment securities.

**Liquidity Risk**

Liquidity Risk is the risk that the municipality will encounter difficulty in meeting the obligations associated with its Financial Liabilities that are settled by delivering cash or another financial asset. The municipality's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the municipality's reputation.

Liquidity Risk is managed by ensuring that all assets are reinvested at maturity at competitive interest rates in relation to cash flow requirements. Liabilities are managed by ensuring that all contractual payments are met on a timeous basis and, if required, additional new arrangements are established at competitive rates to ensure that cash flow requirements are met.

A maturity analysis for Financial Liabilities (where applicable) that shows the remaining undiscounted contractual maturities is disclosed in Notes 51.8 and 51.9 to the Annual Financial Statements.

**51.6 Market Risk**

The municipality's activities expose it primarily to the financial risks of changes in interest rates (see Note 51.7 below). No formal policy exists to hedge volatilities in the interest rate market.

There has been no change to the municipality's exposure to market risks or the manner in which it manages and measures the risk.

**51.6.1 Foreign Currency Risk Management**

The municipality's activities do not expose it to the financial risks of foreign currency and therefore has no formal policy to hedge volatilities in the interest rate market.

**51.6.2 Interest Rate Risk Management**

*Interest Rate Risk* is defined as the risk that the fair value or future cash flows associated with a financial instrument will fluctuate in amount as a result of market interest changes.

Potential concentrations of interest rate risk consist mainly of variable rate deposit investments, long-term receivables, consumer debtors, other debtors, bank and cash balances.

The municipality limits its counterparty exposures from its money market investment operations by only dealing with Absa Bank, First National Bank, Nedbank and Standard Bank. No investments with a tenure exceeding twelve months are made.

Consumer Debtors comprise of a large number of ratepayers, dispersed across different industries and geographical areas. Consumer debtors are presented net of a provision for impairment.

In the case of debtors whose accounts become in arrears, it is endeavoured to collect such accounts by "levying of penalty charges", "demand for payment", "restriction of services" and, as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy. Consumer Deposits are increased accordingly.

Long-term Receivables and Other Debtors are individually evaluated annually at Balance Sheet date for impairment or discounting. A report on the various categories of debtors is drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable.

The municipality is not exposed to credit interest rate risk as the municipality has no borrowings.

The municipality's exposures to interest rates on Financial Assets and Financial Liabilities are detailed in the Credit Risk Management section of this note.

**Interest Rate Sensitivity Analysis**

The sensitivity analysis has been determined based on the exposure to interest rates at the Statement of Financial Position date. The analysis is prepared by averaging the amount of the investment at the beginning of the financial year and the amount of the investment at the end of the financial year. A 100 basis point increase or decrease was used, which represents management's assessment of the reasonably possible change in interest rates. The short and long-term financial instruments at year-end with variable interest rates are set out in Note 51.9 below:

*Cash and Cash Equivalents:*

If interest rates had been 100 basis points higher / lower and all other variables were held constant, the municipality's:

- Surplus for the year ended 30 June 2012 would have increased / decreased by R338,696 (30 June 2011: increased / decreased by R401,228). This is mainly attributable to the municipality's exposure to interest rates on its variable rate investments.

**51.7 Credit Risk Management**

*Credit Risk* refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the municipality. The municipality has a sound credit control and debt collection policy and obtains sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The municipality uses its own trading records to assess its major customers. The municipality's exposure of its counterparties are monitored regularly.

Potential concentrations of credit rate risk consist mainly of variable rate deposit investments, long-term receivables, consumer debtors, other debtors, bank and cash balances.

**Investments/Bank, Cash and Cash Equivalents**

The municipality limits its counterparty exposures from its money market investment operations (financial assets that are neither past due nor impaired) by only dealing with Absa Bank, First National Bank, Nedbank and Standard Bank. No investments with a tenure exceeding twelve months are made.

**Trade and Other Receivables**

Trade and Other Receivables are amounts owed by consumers and are presented net of impairment losses. The municipality has a credit risk policy in place and the exposure to credit risk is monitored on an ongoing basis. The municipality is compelled in terms of its constitutional mandate to provide all its residents with basic minimum services without recourse to an assessment of creditworthiness. Subsequently, the municipality has no control over the approval of new customers who acquire properties in the designated municipal area and consequently incur debt for rates, water and electricity services rendered to them.

The municipality limits this risk exposure in the following ways, in addition to its normal credit control and debt management procedures:

- The application of section 118(3) of the Municipal Systems Act (MSA), which permits the municipality to refuse connection of services whilst any amount remains outstanding from a previous debtor on the same property;
- A new owner is advised, prior to the issue of a revenue clearance certificate, that any debt remaining from the previous owner will be transferred to the new owner, if the previous owner does not settle the outstanding amount;
- The consolidation of rates and service accounts, enabling the disconnecting services for the non-payment of any of the individual debts, in terms of section 102 of the MSA;
- The requirement of a deposit for new service connections, serving as guarantee and are reviewed annually;
- Encouraging residents to install water management devices that control water flow to households, and/or prepaid electricity meters.

There were no material changes in the exposure to credit risk and its objectives, policies and processes for managing and measuring the risk during the year under review. The municipality's maximum exposure to credit risk is represented by the carrying value of each financial asset in the Statement of Financial Position, without taking into account the value of any collateral obtained. The municipality has no significant concentration of credit risk, with exposure spread over a large number of consumers, and is not concentrated in any particular sector or geographical area.

The municipality establishes an allowance for impairment that represents its estimate of anticipated losses in respect of trade and other receivables.

Payment of accounts of consumer debtors, who are unable to pay, are renegotiated as an ongoing customer relationship in response to an adverse change in the circumstances of the customer in terms of the Credit Control and Debt Collection Policy.

Long-term Receivables and Other Debtors are individually evaluated annually at reporting date for impairment or discounting. A report on the various categories of debtors is drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable.

The municipality does not have any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The municipality defines counterparties as having similar characteristics if they are related entities. The credit risk on liquid funds is limited because the counterparties are banks with high credit-ratings.

The table below shows the balance of the 5 major counterparties at the balance sheet date. Management is of the opinion that, although these parties are the 5 counterparties with highest outstanding balances, no significant credit risk exposure exists based on the payment history of the parties, except for Northern Province Academy of Sport and Department of Water and Forestry Affairs for which there is uncertainty about the collectivity. They have been included in the Provision for Impairment of Consumer Debtors.

**51.8 Liquidity Risk Management**

Ultimate responsibility for liquidity risk management rests with the Council, which has built an appropriate liquidity risk management framework for the management of the municipality's short, medium and long-term funding and liquidity management requirements. The municipality manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities. Included in Note 46 is a listing of additional undrawn facilities that the municipality has at its disposal to further reduce liquidity risk (cash).

**Liquidity and Interest Risk Tables**

The municipality ensures that it has sufficient cash on demand or access to facilities to meet expected operational expenses through the use of cash flow forecasts.

The following table details the municipality's expected maturity for its non-derivative financial assets. The tables below have been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets except where the municipality anticipates that the cash flow will occur in a different period.

The municipality has access to financing facilities, the total unused amount which is R305 445 (2011: R575 550), at the reporting date. The municipality expects to meet its other obligations from operating cash flows and proceeds of maturing financial assets. The municipality expects to maintain current debt to equity ratio. This will be achieved through increased service tariff charges and the increased use of unsecured bank loan facilities.

**52 MULTI-EMPLOYER RETIREMENT BENEFIT INFORMATION**

The municipality makes provision for post-retirement benefits to eligible councillors and employees, who belong to different pension schemes.

All councillors belong to the Pension Fund for Municipal Councillors.

Employees belong to a variety of approved Pension and Provident Funds as described below.

These funds are governed by the Pension Funds Act and include both defined benefit and defined contribution schemes.

All of these afore-mentioned funds are multi-employer plans and are subject to either a tri-annual, bi-annual or annual actuarial valuation, details which are provided below.

Sufficient information is not available to use defined benefit accounting for the pension and retirement funds, due to the following reasons:-

- (i) The assets of each fund are held in one portfolio and are not notionally allocated to each of the participating employers.
- (ii) One set of financial statements are compiled for each fund and financial statements are not drafted for each participating employer.
- (iii) The same rate of contribution applies to all participating employers and no regard is paid to differences in the membership distribution of the participating employers.

It is therefore seen that each fund operates as a single entity and is not divided into sub-funds for each participating employer.

The only obligation of the municipality with respect to the retirement benefit plans is to make the specified contributions. Where councillors / employees leave the plans prior to full vesting of the contributions, the contributions payable by the municipality are reduced by the amount of forfeited contributions.

The total expense recognised in the Statement of Financial Performance of R19,245,118 (2011: R16,714,827) represents contributions payable to these plans by the municipality at rates specified in the rules of the plans. These contributions have been expensed.

The Retirement Funds have been valued by making use of the Discounted Cash Flow method of valuation.

**DEFINED BENEFIT SCHEMES**

**Municipal Employees Pension Fund:**

The scheme is subject to a tri-annual actuarial valuation. The last statutory valuation was performed as at 28 February 2008.

The net assets available for benefits were R5 715 557 193.

No further information could be obtained.

**National Fund for Municipal Workers - Pension Fund:**

The scheme is subject to a tri-annual actuarial valuation. The last statutory valuation was performed as at 30 June 2006.

The fund does not have any reserves or surpluses which can be allocated to members' fund records.

The statutory valuation performed as at 1 July 2008 revealed that the fund had a deficit of 6,3 (1 July 2007: surplus R9,5) million, with a funding level of 99,83% (1 July 2007: 100,26%). The contribution rate paid by the members (2,00% to 5,00%) and the municipalities (2,00% to 7,00%) is sufficient to fund the benefits accruing from the fund in the future.

No further information could be obtained.

**Joint Municipal Pension Fund (previously Transvaal Municipal Pension Fund):**

The fund is closed for membership and no new members are allowed to join the fund.

No information could be obtained.

**Municipal Councillors Pension Fund:**

The scheme is subject to an annual actuarial valuation. The last statutory valuation was performed as at 30 June 2010.

The statutory valuation performed as at 30 June 2010 revealed that the market value of the fund was R1 446,8 (30 June 2009: R1 223,7) million. The contribution rate paid by the members (13,75%) and Council (15,00%) is sufficient to fund the benefits accruing from the fund in the future.

As reported by the Actuaries, the Fund was in a sound financial condition as at 30 June 2010.

**Municipal Employees Gratuity Fund:**

The scheme is subject to a tri-annual actuarial valuation. The last statutory valuation was performed as at 30 June 2010.

The valuation performed as at 30 June 2010 revealed that the market value of the fund was R9 774 (30 June 2009: 8 249) million. The contribution rate payable (7,50% by the member and 22,00% by the employer), is sufficient to fund the benefits accruing from the fund in the future. The fund was certified to be in sound financial condition as at 30 June 2010.

**National Fund for Municipal Workers - Provident Fund:**

The scheme is subject to a tri-annual actuarial valuation. The last statutory valuation was performed as at 01 July 2008.

The net assets available for benefits were R3 617 (2007: R3 696) million.

The statutory valuation performed as at 1 July 2008 revealed that the fund had a deficit of 6,3 (1 July 2007: surplus R9,5) million, with a funding level of 99,83% (1 July 2007: 100,26%). The contribution rate paid by the members (2,00% to 5,00%) and the municipalities (2,00% to 7,00%) is sufficient to fund the benefits accruing from the fund in the future.

None of the above mentioned plans are State Plans.

The municipality did not receive any In-kind Donations and Assistance during the year under review.

**57 PRIVATE PUBLIC PARTNERSHIPS**

The municipality was not a party to any Private Public Partnerships during the year under review.

**58 EVENTS AFTER THE REPORTING DATE**

No events having financial implications requiring disclosure occurred subsequent to 30 June 2012.

**59 COMPARATIVE FIGURES**

The comparative figures were restated as a result of the effect of Changes in Accounting Policies (Note 42) and Prior Period Errors (Note 43).

**60 GOING CONCERN ASSESSMENT**

Management considered the following matters relating to the Going Concern:

(i) On 29 May 2012 the Council adopted the 2012/13 to 2014/15 Budget. This three-year Medium Term Revenue and Expenditure Framework (MTREF) to support the ongoing delivery of municipal services to residents reflected that the Budget was cash-backed over the three-year period.

(ii) The municipality's Budget is subjected to a very rigorous independent assessment process to assess its cash-backing status before it is ultimately approved by Council.

(iii) Strict daily cash management processes are embedded in the municipality's operations to manage and monitor all actual cash inflows and cash outflows in terms of the cash-flow forecast supporting the Budget. The cash management processes is complemented by weekly and monthly reporting, highlighting the actual cash position, including the associated risks and remedial actions to be instituted.

(iv) As the municipality has the power to levy fees, tariffs and charges, this will result in an ongoing inflow of revenue to support the ongoing delivery of municipal services. Certain key financial ratios, such as liquidity, cost coverage, debtors' collection rates and creditors' payment terms are closely monitored and the necessary corrective actions instituted.

Taking the aforementioned into account, management has prepared the Annual Financial Statements on the Going Concern Basis.
